

# HOW TO CREATE A PRINT-READY FILE - BANDEROLE DISPLAY AND DROP DISPLAY

The following instructions are designed to help you create a print-ready file. If after reading them you are still unsure about anything, please download the template, visit the FAQ section of our website, request a professional File Check or contact customer support.

## 1 FILE FORMAT

Send your file in PDF format in 1:1 scale (not password protected).

## 2 COLOUR

All files should be sent in **CMYK** (cyan, magenta, yellow, black), with the **Fogra 39 colour profile**. Images in RGB or with PANTONE colours will be converted automatically using a standard colour separation profile.

## 3 RESOLUTION

The optimal resolution for the print files is **between 100 and 150 dpi**.

## 4 TEMPLATE

**Download the template** for your product from the website and use it as the basis for positioning your artwork. You will find the bleed already set up correctly on the template.

**Add your artwork to the Artwork layer, remove all guidelines except the bleed line (green line)** and save the file in PDF format.

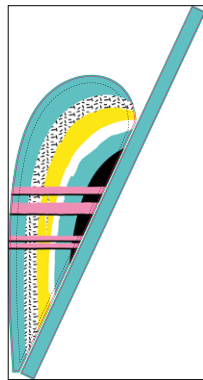

**WARNING:** Do not alter the scale of the design, and **do not resize the template**. Do not use the spot colours **Artios\_Cut, Artios\_Taglio and Artios\_Crease** in the file, as they will not be printed.

**WARNING:** Do not place important artwork **outside the seam line**, as it will not be clearly visible on the finished product

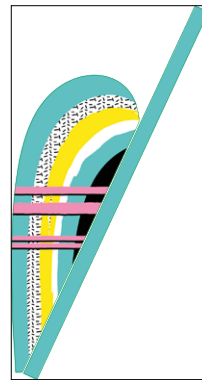

## GOOD TO KNOW - Banderole Display / Drop Display

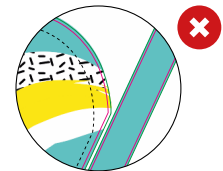

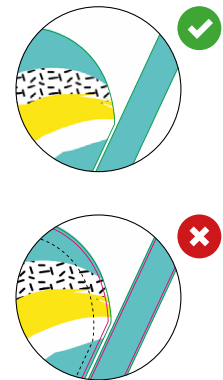

DOWNLOAD THE TEMPLATE

INSERT YOUR ARTWORK on the Artwork layer

DELETE ALL GUIDELINES except the green line

SAVE THE PDF

PRINTED RESULT

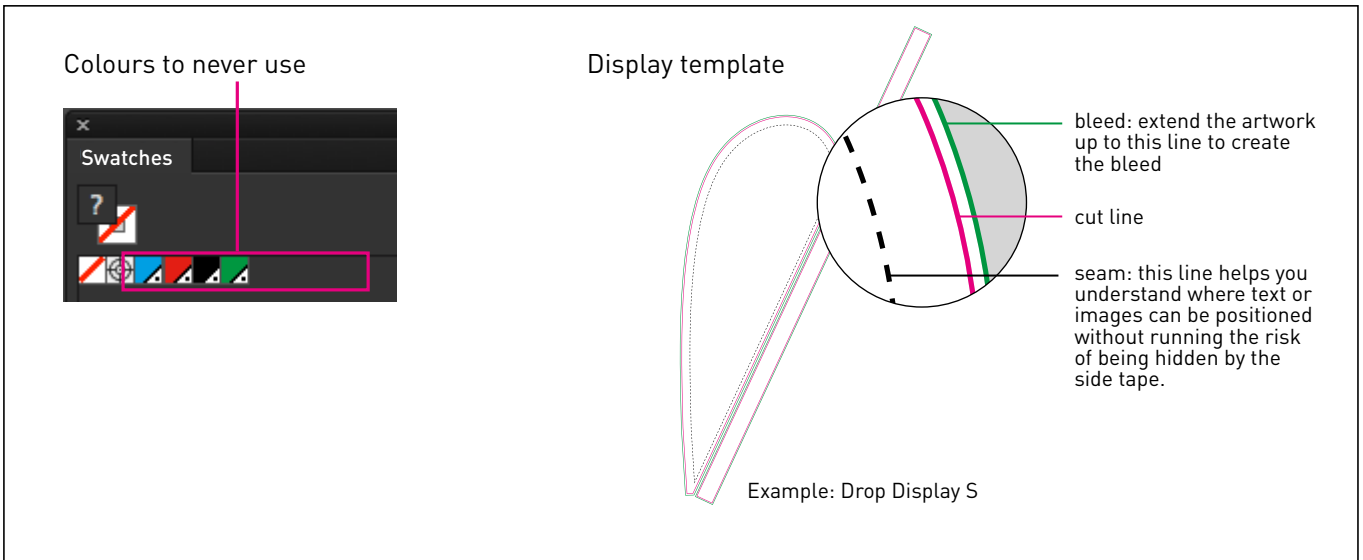

✓ PDF

✓ 100-150 ppi

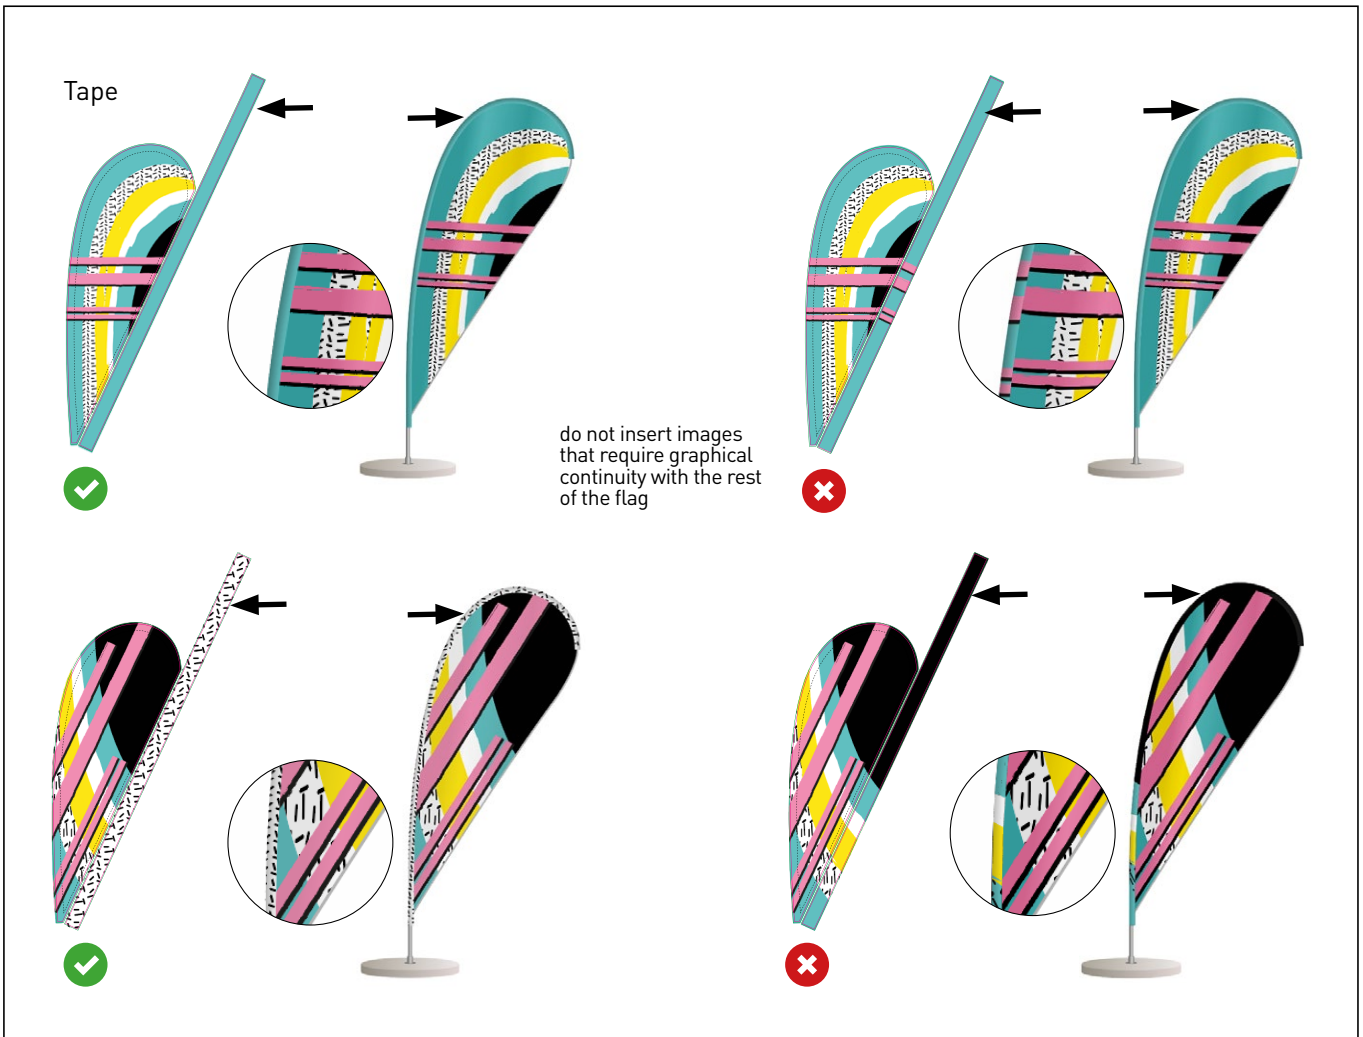

✓ CMYK

✓ FOGRA 39

## 5 TAPE

The tape is sewn along the curved edge, i.e. the opposite side to its position in the template. Pay attention to this when adding your artwork. The tape can be fully personalised, but we do not recommend adding important information or an image that requires graphical continuity with the rest of the flag, as the two parts may not be perfectly aligned.

## 6 ADDITIONAL INFORMATION

The minimum line width is 0.5 pt. The minimum printable font size is 12 pt. **We do not advise placing frames and passepartouts too close to the edges**, to avoid any inaccuracy due to the cutting tolerances.
